SHADE REVOLUTION

More than two decades ago, our quest began. We started small but dreamed big. Our founder, Dougan Clarke, grew up in Miami spending every free moment on the ocean. A skillful boat rigger with an entrepreneurial spirit, he saw an opportunity to reinvent a product that allowed people to more comfortably connect with the outdoors.

Unsatisfied with the shade solutions that existed, he looked to marine technology to transform the category of shade from short-lived and ordinary to enduring and extraordinary. He started TUUCI in a boat rigging workshop in 1998, setting in motion a shade revolution that continues to set the industry standard.

Constructed entirely by hand, each shade system is a precisely crafted engineering marvel. Inspirations from a lifelong passion for the ocean are reflected in the design and detail of every product. Industry-leading patents, award-winning designs, marine grade components, serviceability and performance canopies are part of an unyielding commitment to redefine the shade industry.

As our journey continues, we remain steadfastly committed to creating products that allow us all to enjoy nature in its most basic form – a comfortable place in the shade.

THE JOURNEY IS OUR DESTINATION

We are on a journey to share our form and function in the most exposed and beautiful environments on the planet. It is by observing first hand the extremes in nature that we get the inspiration to design products that meet its resilience.

DOUGAN CLARKE

TUUCI FOUNDER & PRODUCT ARCHITECT

AUTHENTIC MARINE GRADE

The exacting standards of the marine world are reflected in everything we create. That's why our parasols use marine grade aluminum alloy, fiberglass and stainless steel to create beautiful yet extremely durable shade structures that perform in the toughest environments.

ENDURING ELEGANCE

Beauty and durability synchronize flawlessly with our Plantation Aluma-TEAK. For over a decade, we have perfected the art of creating the indistinguishable appearance of hardwood, impervious to seaside corrosion and UV degradation. The result is a product uniquely inspired by nature with everlasting resilience.

THE SCIENCE OF SHADE

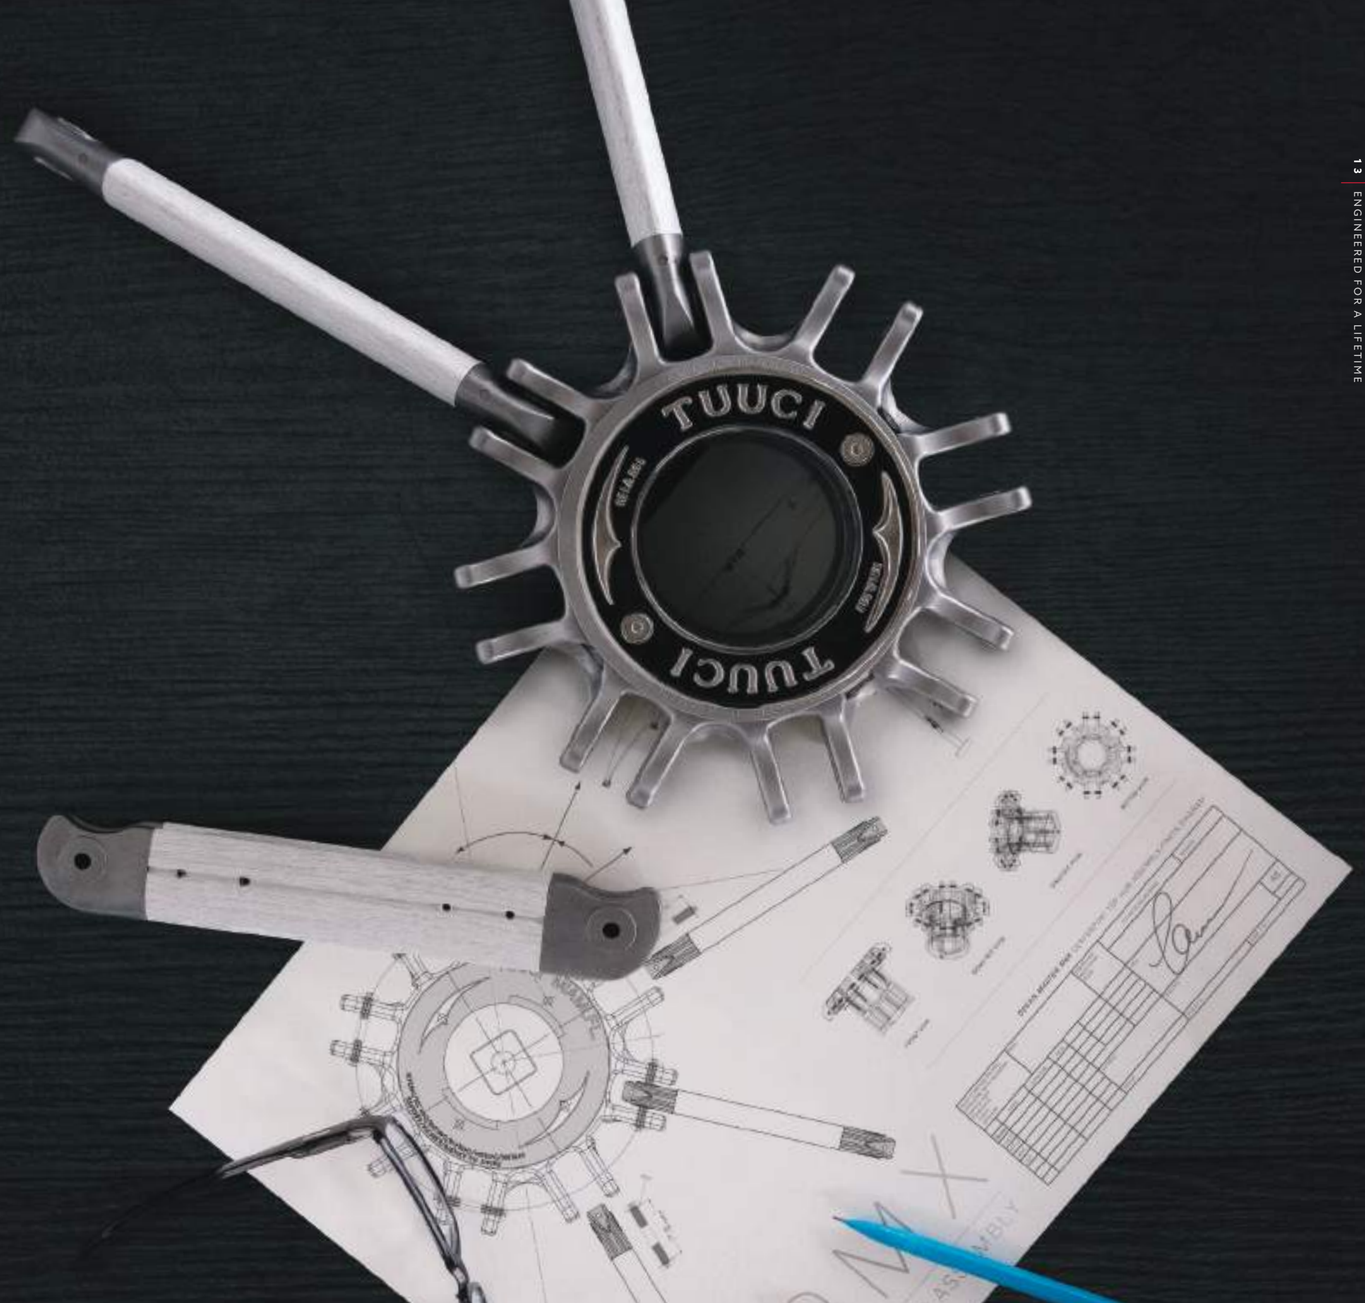
Recognized around the world for unparalleled function, we stand alone in a category defined only by our latest advancements in shade engineering.

We draw upon decades of field data derived from real usage and exhaustive wind testing to ensure our products perform as intended. We love to challenge our products and push them to new extremes. We learn by doing.

ENGINEERED FOR A LIFETIME

We re-imagined the outdoor parasol in a way that is both exceedingly durable and long-lasting. The modular design of our patented independent bracket hub system allows for simple maintenance, adding years of life to each of our shade structures.

Our commitment to creating best-in-class shade architecture is matched only by a best-in-class warranty.



TAILOR-MADE SHADE

We are honored to have received countless Design Excellence Awards, but we are proudest to see how our products complement the creativity of others. With boundless fabric, trim, fringe, finish choices and combinations, our parasol and shade systems provide an opportunity to elevate any space.

We dream. We imagine. You create.

Positive Vibes Only

ONE COMMON THREAD

The crafting of shade architecture begins and ends at our manufacturing campus in Miami, Florida. Almost 400 people strong, together we have built a company that is like family. We are bound by our love of community, our passion, and a vision to create products that allow people to comfortably connect with their surroundings and enjoy a comfortable place in the shade.

Every silhouette in the Ocean Master MAX Collection stuns, and the engineering allows each parasol to cast its shade even in the toughest of conditions.

The V-MAX Strut is exclusive to the collection and designed to resist wind forces with its radial strength precisely where needed most. The telescoping mast with stainless steel guide and proprietary gear system allows the canopy to sweep above furniture and makes opening and closing a snap.

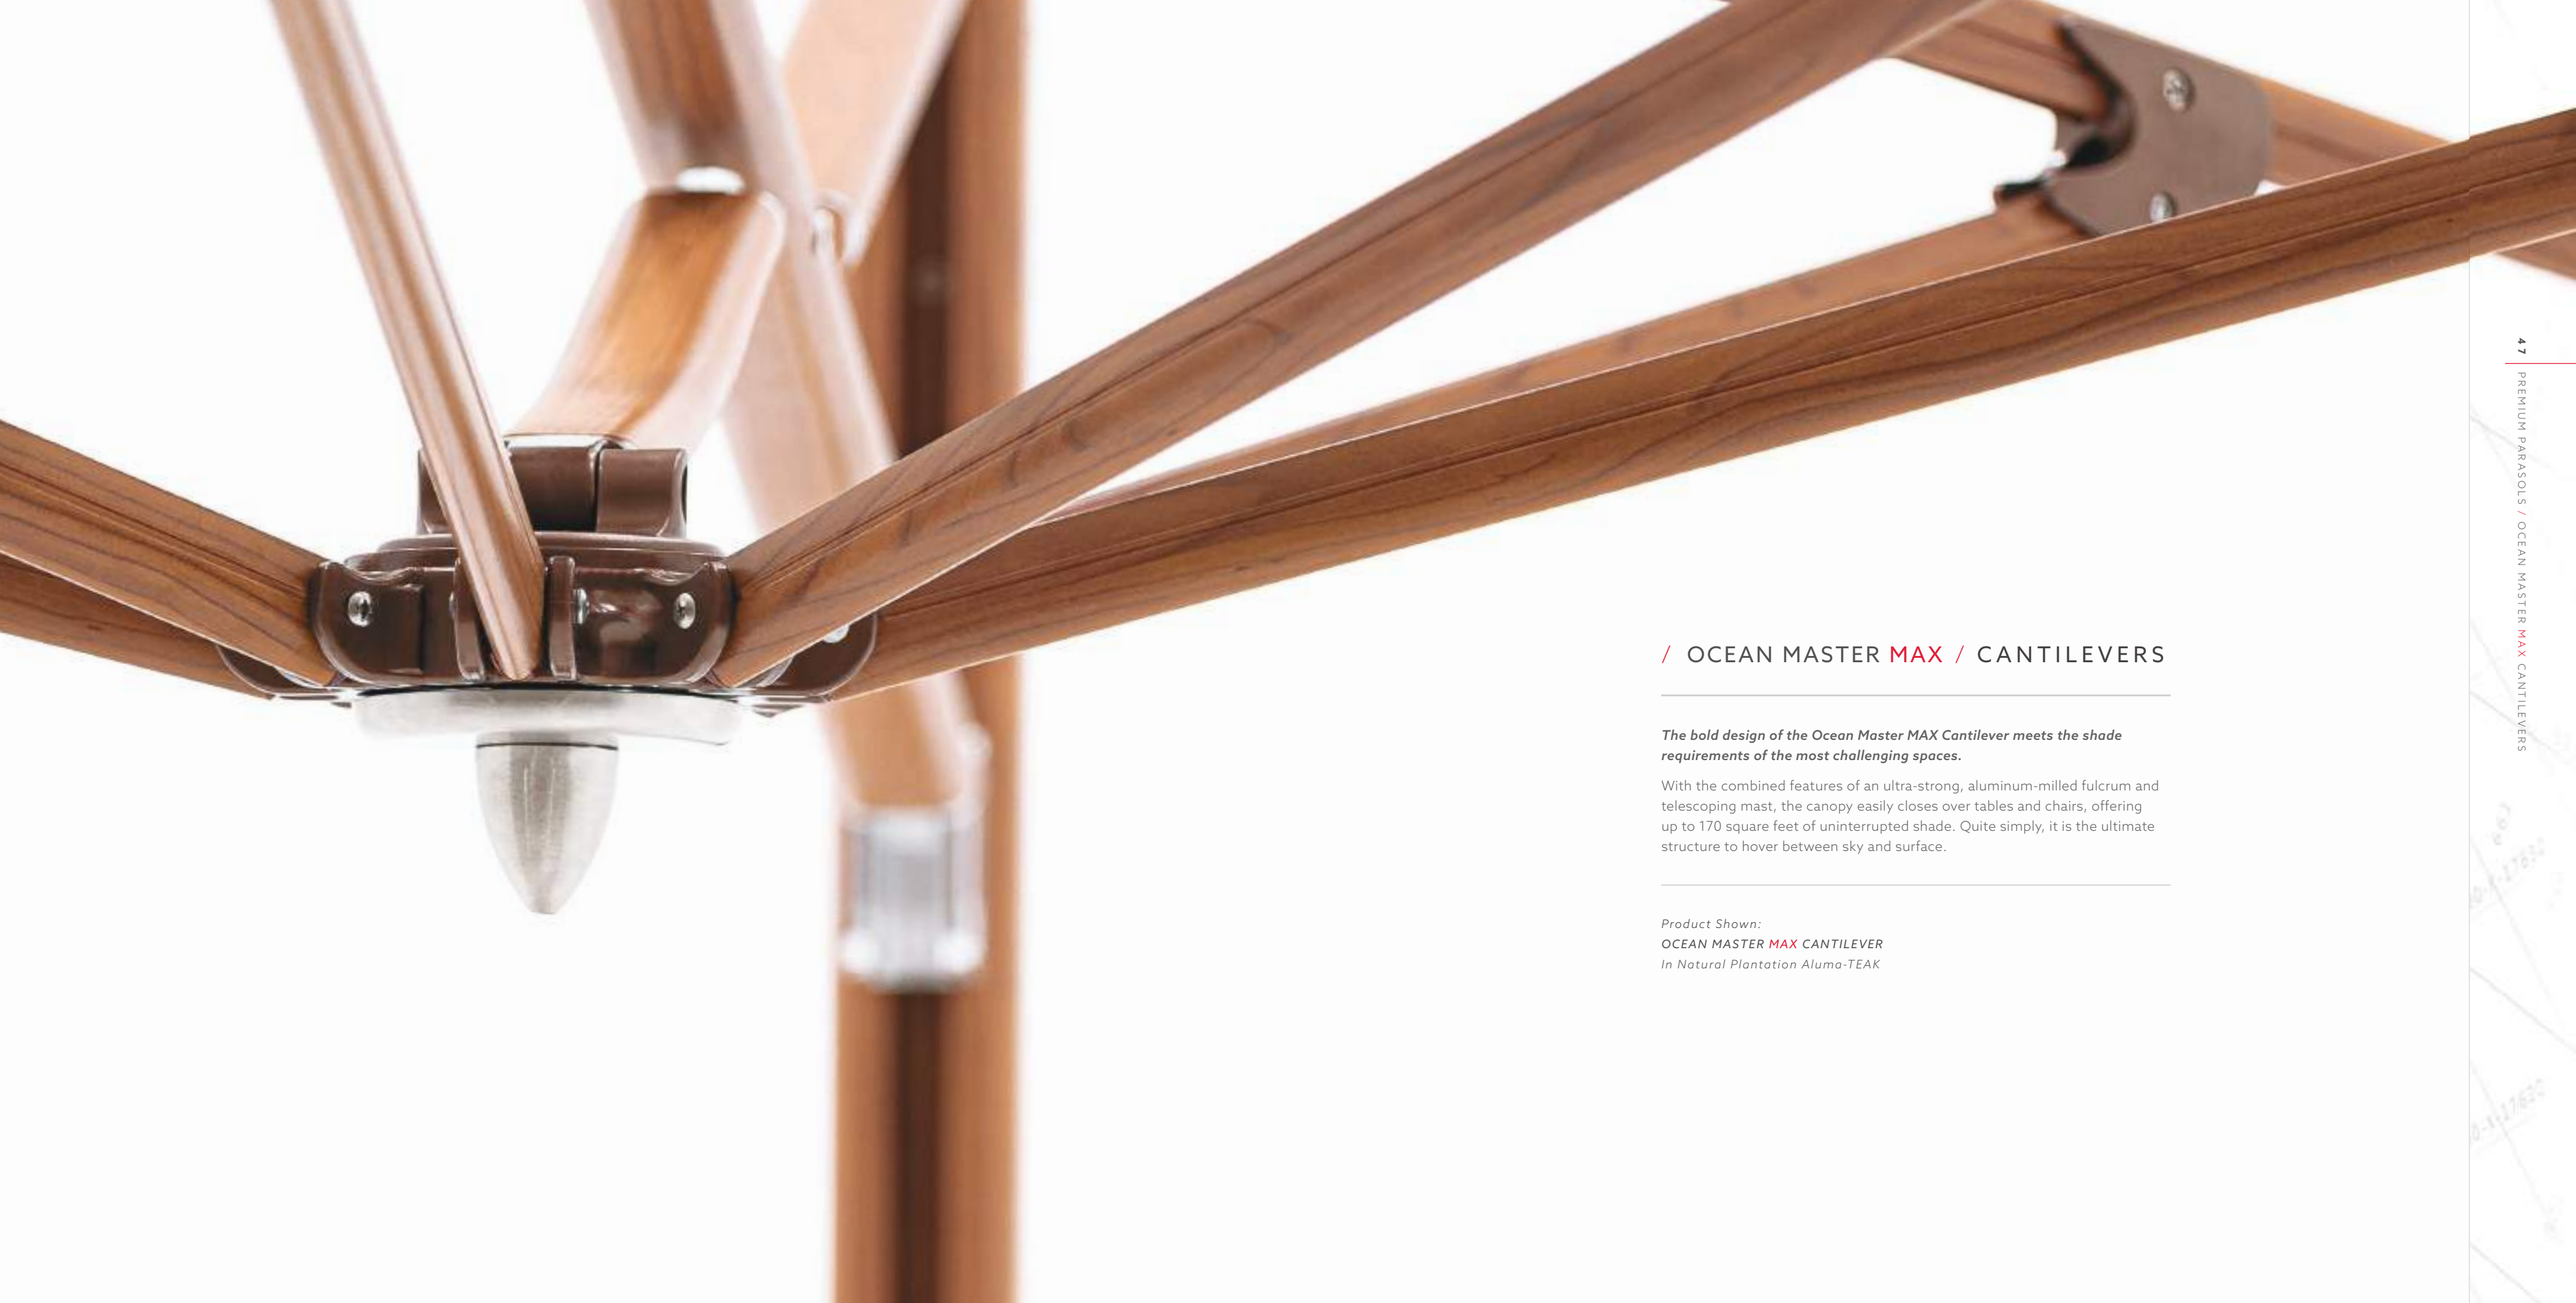
/ OCEAN MASTER MAX / NAUTICAL TEAK

Our Ocean Master MAX Nautical Teak parasols combine the natural beauty of authentic teak hardwood with TUUCI's nautical architecture skills to reinvent a timeless classic. Drawing upon techniques honed by our yacht rigging background, this award-winning parasol's mast is enhanced with Aluma-CORE technology, a marine grade aluminum super-structure durably encased in ample amounts of Grade A, plantation-grown teak, harvested in accordance with the strictest environmental standards. The Aluma-CORE mast also enables our proprietary gear system and telescoping mast, which allows the parasol to gracefully deploy without interfering with the furniture below.

Adding to its elegance and distinction, the innovative core is also reflected in external chassis reinforcements clad in polished yachting grade 316 stainless steel alloy. Further influences from the yachting world include reinforced canopy construction for high-wind exposure and inspired trimming details. Design and durability are thoroughly linked at key structural points for unmatched beauty and longevity with the new Nautical Teak Parasol Collection.

PRODUCT DETAILS PAGE 200



/ OCEAN MASTER MAX / CANTILEVERS

The bold design of the Ocean Master MAX Cantilever meets the shade requirements of the most challenging spaces.

With the combined features of an ultra-strong, aluminum-milled fulcrum and telescoping mast, the canopy easily closes over tables and chairs, offering up to 170 square feet of uninterrupted shade. Quite simply, it is the ultimate structure to hover between sky and surface.

/ OCEAN MASTER

The Ocean Master Classic, the original TUUCI product introduced over twenty years ago, anchors our parasol line with its timeless innovation and beauty.

Winner of a variety of industry awards, the Ocean Master is an architectural triumph in shade engineering and design. Constructed to withstand the harshest environments, it is the combination of long-lasting utility and simple elegance. The patented modular and marine grade construction provide durability, ease of use and endurance.

/ STINGRAY

The Stingray is in a class of its own. Rotating 360 degrees around its vertical axis, our distinctive shade sculpture can be positioned to block the sun at any time of the day. The expansive tensile skin and polished wrought aluminum mast is incredibly durable and provides long-lasting shade luxury.

Inspired by the ocean creature itself, the Stingray's profile echoes a ray's wings and casts a graceful shadow for years of artful shade.

BESPOKE & BRILLIANT

From hinge to fringe, tailor-made shade brings your vision together with numerous combinations of shade, fabric, fringe and configurations. ***With an exhaustive range of options, the possibilities are truly in the eye of the beholder.***

SHADE YOUR WAY

Shade brilliance is born in the details. Artfully inspired trims, tassels and bindings can be integrated with a variety of shade silhouettes, adding glamour or classic charm to an already elegant canvas.

OCEAN MASTER PAGODA
in Graphite

COVETED CANOPIES

Using the most durable and fade-resistant outdoor fabrics, our canopies are precision tailored to fit each frame perfectly. Canopy pockets are reinforced with ballistic nylon and seams are hand-sewn with acrylic thread providing superior durability under the sun's UV rays.

Extensive color choices and tailor-made screen printing turn parasols from objects of design into objects of desire.

Product Shown:
OCEAN MASTER MANTA
In Polished Titanium

DESIGN & DURABILITY

With over 20 years of shade innovation, we know the anchor is the mainstay of a secure parasol. From stainless steel to stone, TUUCI's shade anchors use only the toughest time-tested materials to ensure precise performance and extended function for a lifetime of use. Stainless steel flush mounts, galvanized steel and aluminum concrete-filled shells are nearly indestructible and secure shade structures from small to large. Pair with a TUUCI Aluma-SKIN or premium finish and go beyond function to fabulous.

Although TUUCI shade equipment is rigorously tested and built to withstand forces of nature, we do not recommend the use of any collapsible shade equipment in winds that exceed 25 mph. The size of your parasol and installation location will greatly influence the amount of anchor weight required for safe operation. Please consult an authorized TUUCI dealer or representative directly for recommendations.

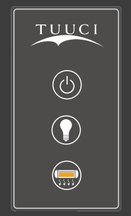
INTELLIGENT AUTOMATION

TUUCI's automated shade platforms redefine collapsible shade technology as you open and close our largest umbrellas with the push of a button.

Automation and shade seamlessly integrate with our convenient and intuitive touch pad interface. Shading, lighting, and heating come alive at your fingertips, with technology driven by a modular control unit that features smart safety protocols. A whole new level of intelligent design has been reached.

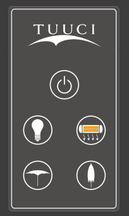
CONFIGURATION OPTIONS

Automation to suit your individual needs. Choose from three pre-set configuration ***options available for both the Single and Dual MAX Cantilevers.***



LIGHT AND HEATERS

LIGHT AND AUTOMATION



LIGHT, HEATERS AND AUTOMATION

AMBIENT ILLUMINATION

Extending the day or extending the season, TUUCI's Ambia LED Light complements the outdoors with indoor comforts.

At night, the marine grade LED light fixture casts an ambient glow into the canopy of the parasol, bright enough to read a book under, while soft enough to complement al fresco dining. During the day, the ingenious design is nearly invisible as the light fixture and wiring are discreetly tucked away.

ELEGANT ILLUMINATION

TUUCI's cutting edge Ambia LED Light illuminates upward into the canopy and distributes light evenly underneath the umbrella.

TOUCH CONTROL

With the easy-to-use touch control system, on-off and dimming are activated by touching the finial underneath the umbrella's hub.

* Highlighted area indicates touch-sensitive surface.

RADIANT HEAT

To enhance the outdoor area and prolong the number of days comfortably spent there, two or four UL-approved infrared heaters can be integrated into the construction of the MAX Cantilever and Center Post parasols.

Marine grade wiring runs inside the frame and each heater is affixed to the structure of the parasol, allowing for even distribution of heat to those seated below. Smart safety features include emergency shut-down, automatic heater cool down and automatic lock-out feature. The entire system is modular, allowing easy replacement in the unlikely event electronics fail.

EXTEND THE SEASON

User control panel provides an intuitive way of adjusting the climate under the parasol's canopy with a simple push-button, icon-based interface.

EASY 360° ROTATION

Easily rotate the umbrella into any position for maximum shade coverage throughout your day.

FLUID TILT RANGE

Multiple locking points along the entirety of the mast achieve the perfect tilt angle desired.

SHADE AT EVERY ANGLE

Beautify your outdoor space with the TUUCI Cantilever with tilt option. Designed to block sun and add privacy at any angle, the thoughtful design allows for 360 degree rotation on its base and includes unlimited adjustment along the mast for a variety of angles and extremely simple operation.

Whether you have challenging spaces or just want the flexibility to deliver shade at every position of the sun's arc, the tilt option is a beautiful solution.

FLUID TILT AND ROTATION

The umbrella's design allows for 360° rotation on its base, and multiple locking points along the mast for fluid operation.

Available on the following umbrellas:

- ***OCEAN MASTER MAX CANTILEVER***
- ***OCEAN MASTER MAX ZERO HORIZON CANTILEVER***
- ***BAY MASTER CANTILEVER***

/ VINEYARD

The Vineyard parasol is reminiscent of classic European designs from a bygone era. The classic center post is engineered with Dura-TEAK, a polymer that looks like wood, but is impervious to saltwater and UV degradation. The Vineyard cantilever offers expansive shade with a durable Aluma-TEAK mast. All Vineyard Collection products include our Copperstone resin modular hub, stainless steel fasteners, and precision-tailored canopies.

A : Manual lift with stainless steel pin

B : Reinforced strut joints

C : Dura-TEAK finish

ULTIMATE SHADE BRANDING

How you promote your brand says something about it. That's why TUUCI will showcase it with the enduring quality it deserves. That means nailing the details, like quality printing on both the top and the underside and delivering exact color matches to your visual identity.

Around the globe, leading restaurant brands, franchises and luxury resorts rely on TUUCI to deliver shade made right. Our in-house designers will execute your corporate identity and brand vision, creating a stunning asset for your restaurant, hotel, franchise or business. Your brand is made to last. It deserves shade made the same way.

PANTONE MATCHING

Your brand guidelines and messaging are perfectly matched and flawlessly executed.

DESIGN SERVICES

Turn your vision into a reality with help from our in-house design team.

PIXEL PERFECT PRINTING

Exacting standards lead to precise results with our logo printing process.

LONG-LASTING COLOR

We use dyes and techniques that will last for years to come, even under the harshest conditions.

RESPONSIBILITY

OUR COMMITMENT TO SUSTAINABILITY AND OUR COMMUNITY

Our mission in shade design connects our passion for sustainable and enjoyable lifestyles the world over. For over two decades, we've been guided by our love of the natural environment and our community in everything we do. As we enter our third decade, we continue to commit to the following principles and continuously challenge ourselves to do better.

PRODUCT DURABILITY

All of our products are engineered for a lifetime of serviceability with replaceable parts and marine grade components, reducing global waste. Through our designs, we ensure less disposal of our products which saves landfill space and conserves energy.

RESPONSIBLE OPERATIONS

The high standards we set for our products' functionality and durability is reflected by how we operate our facilities. TUUCI continues to recognize innovative opportunities to minimize material waste, while maintaining our premium quality. From our fabric recycling program to the sourcing processes in our facilities, we aim to reduce our ecological footprint as we reduce our waste.

COMMUNITY

We believe good deeds begin at home. Through philanthropic and volunteer efforts, TUUCI contributes to multiple organizations that provide benefit to the environment, education and shelter to disadvantaged families in South Florida. We seek to be active and generous contributors to the community we love.

TUUCI Cares

WARRANTY

TUUCI products are constructed with the finest marine grade materials available and rigorously tested in extreme weather conditions. We proudly stand behind the integrity of our manufacturing and design and strive to exceed your expectations.

With a best-in-class warranty of up to 15 years for our premium parasols, your investment will continue to offer years of comfort and enjoyment. We are committed to providing a shade experience like no other in the world. For specific information on our coverage, visit tuuci.com/warranty.
